

## Planting and Care Instructions for Glamini® pot Gladiolus

Information to help you be more successful with Glamini® pot Gladiolus

### About Glamini®

Do not confuse Glamini® with your average Gladiolus. Glamini® Gladiolus bloom for a long time and their short height make them very suitable for pot growing. Discover this unique and exclusive product and its outstanding quality. Glamini® is a registered trademark.

### Upon arrival

Open all cartons immediately after arrival, as the bulbs need fresh air. Always check bulbs directly after arrival and take notes of possible problems. If there are any problems, be sure to contact your sales representative immediately.

### Soil

Glamini® can be grown in regular, high quality, pre-fertilized potting soil. Keep the soil humid at all times, never allow the soil to dry out.

### Planting and Maintenance

Numbers per pot depend on pot size. As a guideline we advise to use approx. 15 bulbs on a 12" pot/bowl or 20 bulbs on a 14" pot/bowl. Glamini® needs full light for the best result. Pots can be placed close together directly after planting. At 2<sup>nd</sup> leave stage relocate the pots with 1 or 2 pot sizes in between. Depending on the availability of light the pots can be kept this way or need a bit more space. Maximum light will improve the quality and will give the best proportions, so the best location is outside. Also in a modern greenhouse with a good light – temperature ratio Glamini® can be grown very well. Glamini® needs 75-90 days to grow from a bulb to a blooming plant.

### Disease and Pest control

In normal conditions Glamini® needs no special care against diseases. Only when grown in very humid conditions leaves might need protection against fungi like botrytis. Spray 2 to 3 times against insects like greenflies and trips, starting at the 3<sup>rd</sup> leaf stage.

### Marketing and sales tips

The best time to sell Glamini® is just before they flower. Picture tags are a great help to make the sales season longer.

### Claims or Comments

If you run into anything that is not acceptable to you as a grower, we need to know. Please call your sales representative and explain in detail where you have experienced the problems. We will do anything we can to help you and make our organization better in the future. We do our best to ship viable, healthy plants, but we understand that problems do occur. If you feel there is a problem, please write within 10 working days of receipt of your order so we may render any possible assistance. In all cases **we need pictures** of the individual plants, the complete shipment, roots etc. If your shipment has been damaged or shorted, note this on the delivery documents and file a claim with the carrier right away. Also please notify us of any delays. All claims, damages, spoilage and shortages must be reported to us in a written note or letter stating the problem **within 10 working days**.

**Claims received after this period or claims that are not supported by pictures will be respectfully declined.**
