Peony Lady Orchid

This lovely, light-pink Peony puts a smile on your face every year. If this Peony is well-established, it comes back every year and heavily blooms in the garden. The blossomy Peony with its light-fragrant scent produces double flowers with a unique shade of near-lavender pink. The strong green foliage makes this Peony perfect for cut flowers. These peonies grow up to 28-30"; (70-75 cm) tall and stand out in every border.

How to plant Peony Lady Orchid

This pretty lady needs to be planted in the fall, from September to October. This way, the roots have enough time to establish. After 2-3 years, if the roots are strong enough, the first flowering period starts. The plant produces large pink flowers that are slightly fragrant. Make sure you choose a sunny spot for the peony plant. The more sun, the brighter the colors of the flower.

Herbaceous Peony Lady Orchid

- The soft-lavender pink double flowers bloom in mid- to late spring
- The Peony Lady Orchid sometimes need support with from a wireframe
- Grow Peony Lady Orchid in deep, humus-rich soil
- Keep the soil moist but well-drained
- Prefers a sunny spot
- The flowers make a wonderful display combined with blue forget-me-nots
- Don't move the peony plant, this will damage the growth
